Nordsø, gram mofonkunstner

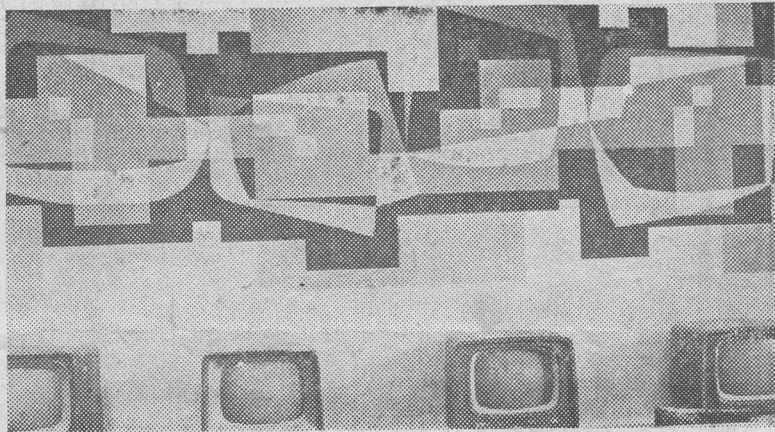

I FONA RADIO's nyindrettede forretning på Strøget har den unge tegner og maler Jens Nordsø netop afsluttet et nonfigurativt vægmaleri i fjernsynsafdelingen på første sal.

Jens Nordsø var på BAGSIDEN's spalter en gang i sommer, da vi fortalte om hans arbejde med at tegne gram mofonpladeomslag til 45 omdrejnings plader hos Metronome. Det arbejde fortsætter han stadig med, og det har han gjort så godt, at musikforlaget »Chappelen« i London nu vil have ham til tilrettelægge og tegne et af deres kataloger.

Fra New York har gram mofonselskabet »Period« bestilt ham til at tegne omslaget på alle de af selskabets plader, som teknisk fremstilles her i Danmark.

2nd November, 1956

Since writing this we have been trying to cut the motion 'News, News' is OK but at the end of Quiz the guitar is fighting the Bass - so we're going to wait for the scene & try & cut in another version, perhaps from the original tape without guitar just for that part. Will keep you informed.

B. Fabricius-Bjerre Esq.,
Metronome Records a.s.,

Denmark.

Dear Bent,

Firstly: Congratulations on the way you have added the Guitar to QUIZ and NEVER NEVER, they both sound very good now.

Secondly: As you are aware, I am now about to print a new main Catalogue for the Music Library and I wondered if you would like to present me with a design for the title page by one of your brilliant young artists. I remember you showing me some most artistic efforts which you were using on classical LP and EP sleeves. I, of course, want something very contemporary and sophisticated. The size of the cover will be 10 inches deep by 7 inches across and the only wording to appear on it is "CHAPPELL" and "RECORDED MUSIC LIBRARY".

Have you any ideas ? We are, of course, in a great hurry !!!

Best wishes,

Yours sincerely,

R. C. Denton

PRINCE

Prince med det sensationelle Whitron-filter er blevet den store succes, fordi Prince er filtercigaretten, der giver den fulde tobakssmag og det lette træk!

**PRINCE har det verdens-
kendte Whitron-filter**

Det eneste effektive filter, der samtidig giver Dem den fulde tobakssmag — et dunblødt, snehvidt fiberfilter med tusindvis af celler.
